

VERITAS

The Army HQ Planning & Forecasting Tool driving cost and efficiency savings across the equipment programme

Our VERITAS product is a bespoke planning and forecasting tool currently used by Army HQ to drive cost and efficiency savings across the Land domain.

WHAT IS VERITAS?

Developed by our talented team alongside the Army HQ's D-Programmes team, VERITAS provides a unique decision support tool that automates manually intensive processes for the Equipment Support Team, whilst providing a baseline from which military judgement can be used.

BENEFITS

COST & EFFICIENCY SAVINGS

Bridges the gap between organisations, their people and their clients by centralising and sharing data.

INSIGHTFUL DECISION-MAKING

Provides clear insight into supply chain planning, transforms decision-making and encourages a culture of transparency.

GREATER FORECASTING

Enables organisations to forecast operations effectively across demand, supply and risk, by exploiting data science.

PERFORMANCE MONITORING

An integrated solution to performance & contract management, enabling monitoring & improvement.

ROBUST SCENARIO MODELLING

Provides a robust scenario modelling capability enabling organisations to quickly assess the impact of decision-making.

GREATER STAFF AUTONOMY

Provides a dedicated support desk function, user guides and an in-built interactive help tool to enable staff to learn.

CHOOSE FROM 6 INDEPENDENT MODULES

FORECASTING

Businesses can combine, visualise and interrogate data across physical assets, providing a single view of status and availability at any level of detail, supporting asset decision making.

PERFORMANCE MANAGEMENT

Gives management teams clear insight into supplier and department performance against performance levels. The Key Performance Indicator suite enables businesses to input and work with KPIs.

SCENARIO MODELLING

Gives businesses the ability to model and cost any potential commercial uncertainty, gaining valuable insight into how to mitigate a risk or seize an opportunity.

MUNITION PERFORMANCE

Our ammunition performance suite provides a detailed picture of ammunition supply chain performance. Users can assess demand, consumption and returns, and better understand supply chain performance.

ENGINEERING ANALYSIS

VERITAS enables businesses to get a big picture view of their fleet management processes. Users can view and analyse platform and fleet activity, maintenance, failures, and repair data.

STAFF TRAINING

VERITAS provides businesses with the capability to precisely cost, forecast and monitor staff training programmes, and view historic training data.
